

SMART Board® interactive display overlay

A powerful visual tool

The SMART Board interactive display overlay attaches to your flat-panel plasma or LCD display, giving it whiteboarding capability. It blends interactivity with brilliant visuals, making it perfect for presentations and collaboration sessions. The touch-sensitive screen enables you to use your finger or a pen to move through presentations, navigate websites or open applications and write notes in digital ink, save them to your files and share them via e-mail. The interactive display overlay is a powerful and sophisticated addition to your meeting spaces.

Fit for your flat-panel display

Compatible with a wide variety of flat-panel display sizes and brands, the SMART Board interactive display overlay uses DVIT® (Digital Vision Touch) technology to ensure precision touch and an accurate writing experience. And the scratch-resistant surface protects your flat-panel display without compromising image quality. The included mounting straps securely attach the overlay to your flat-panel display. For a list of flat-panel plasma and LCD displays that are compatible with the overlay, visit smarttech.com/overlaysupportedpanels.

- 1** Touch surface
- 2** Pen ledge
- 3** Interactive display overlay

Key features

Precision touch

Write, erase and perform mouse functions with your finger – no special tools required. SMART's proprietary DVIT technology uses cameras to track contact on the screen, delivering a superior touch experience.

Digital ink

Write in digital ink over applications, websites and videos.

Save function

Instantly save and capture notes.

Protective surface

Protect your flat-panel display with an unobtrusive, scratch-resistant, touch-sensitive surface.

Mounting straps

Attach the overlay securely to your display with the provided straps.

SMART Mobile Stand for interactive displays

Add mobility to your SMART Board interactive display overlay with a height-adjustable solution that makes it easy to move the display and audio-visual equipment to a variety of meeting spaces. The stand includes integrated speakers, a locking cabinet, casters that swivel and lock, and a cabling and power-distribution system.
